Subject: Private Well Letters/Sampling, etc.

Hi Steve,

The draft letters to look fine to me. I plan to follow through with EPA letters shortly.

To clarify, the EPA letters to will continue to reference the Mass. standard, but will also explain the NDMA results in the context of excess cancer risk (similar letter format EPA has used for). EPA's recommendation for these properties will be no restrictions on use at this time and to retest. I also just realized I need to mail letters to which will change the recommendation from EPA to restricted use consistent with the distribution of bottled water last November.

Please confirm when the 4th quarter letters from Olin hit the mail system.

On a related matter, I do intend later this week to notify the town and WERC that NDMA has been detected in 6 additional wells. In doing so, I intend to provide the attached figure created by Nobis.

Please let me know if you have any concerns. I will talk with you tomorrow morning at 10:00am.

Thanks -
Jim
